

Aref Ganjaee Sari

MSc Student in Software Engineering

 Tehran, Iran

 aref.ganjaee1@yahoo.com

 GitHub: <https://github.com/arefganjaee1>

Research Interests

- Alignment and Safety of Large Language Models
- Preference Learning and Direct Preference Optimization (DPO)
- Training Stability and Optimization in Neural Networks
- Trustworthy and Interpretable AI
- Reinforcement Learning from Human Feedback (RLHF)

Education

M.Sc. in Software Engineering

Islamic Azad University, Tehran West Branch

2024 – Present

- Current status: Semester 3
- Expected defense: 2026
- Thesis (planned):

Adaptive- β Direct Preference Optimization for Stable Alignment of Large Language Models

B.Sc. in Industrial Engineering

University of Qom

2019 – 2023

- Completed in 9 semesters
- GPA: 13.25 / 20

Publications & Preprints

Adaptive- β Direct Preference Optimization for Stable Alignment of Large Language Models

Aref Ganjaee Sari

- Preprint submitted to SSRN (under moderation)
- Manuscript under preparation for workshop submission
- This work is planned to form the basis of the MSc thesis and further PhD research

Research Experience

MSc Thesis Research (in progress)

2024 – Present

- Investigated sources of training instability in Direct Preference Optimization for large language model alignment
- Proposed an adaptive strategy for dynamically adjusting the β coefficient during training
- Designed preference uncertainty-based intrinsic signals to regulate optimization behavior
- Conducted controlled experiments on GPT-2 models using the Anthropic Helpful–Harmless dataset

- Evaluated training stability through gradient norm and reward margin dynamics
 - Gained experience conducting research under limited academic infrastructure
-

Technical Skills

- Programming Languages: Python, Swift
 - Machine Learning: Deep Learning, NLP (foundational, research-oriented; transformer-based models), Preference Learning
 - Frameworks & Tools: PyTorch, Hugging Face Transformers, Git, LaTeX
 - Software Development: iOS Application Development
-

Language Skills

- Persian: Native
 - English: Intermediate (IELTS in preparation)
-

Additional Information

- Strong motivation for pursuing research-oriented PhD training
 - Active, self-driven learner with a clear interest in AI research
 - No academic gap
-
